PROJECTS

- **OralSync – Graduation Project (Excellent)**
  - Duration : Oct 2023 - July 2024
  - Description : In an era where healthcare accessibility remains a global challenge, OralSync emerges as a beacon of hope, leveraging mobile technology to address the disparity in dental care access. This graduation project presents a transformative mobile application designed to forge a symbiotic relationship between dental college students and financially disadvantaged patients, facilitating essential dental examinations.

- **HDS System Company Website**
  - Duration : Sept 2023 – Dec 2023
  - Description The HDS System Company website provides a comprehensive overview of the company's HR management solutions and IT services. It highlights the company's unique offerings, including customized HR solutions, cutting-edge technology, real-time monitoring, experienced developers, and full support. The site outlines the company's work process—training, development, and consulting—demonstrating its commitment to enhancing HR systems and supporting long-term development. Additionally, it showcases the company's diverse IT services such as web and mobile application development, server management, and IT consulting. The website also features client testimonials, resources, and a unified portal for managing services, projects, and billing.
  - Live Demo **:** https://hds-sa.org

- **Hr And Payroll**
  - Duration : Mar 2023 - Present
  - Description : Developed a comprehensive HR and Payroll system that streamlines and automates various aspects of human resource management and payroll processing. The system efficiently manages employee information, tracks attendance, calculates salaries, and generates payroll reports. Leveraged modern technologies to create a user-friendly and efficient solution for managing HR and payroll functions

`

- **Invoices App**
  - Duration : Aug 2022 – Jan 2023
  - Description is a feature-rich application designed for managing company invoices. It includes functionalities for calculating invoices, tracking payments (paid, unpaid, partially paid), and handling commissions. The app features a modern front-end theme and uses Breeze for secure user authentication. It supports secure storage of invoices and files, soft deletion, data archiving, and the ability to print invoices and export data to Excel. Additionally, it provides reporting, statistical insights, and database notifications. User roles and permissions are managed with Spatie Permissi

- **Food Order**
  - Duration : Oct 2022 - Dec 2022
  - Description : The Online Food Ordering System (Food Order) is a web application designed as a graduation project from the ITI Institute. It features two distinct components: a customer-facing app for placing food orders and a restaurant management app for order retrieval and processing. This project showcases the ability to streamline food ordering and management processes for both customers and restaurants.

- **Queueing Theory Project (Java)**
  - Duration : Oct 2022 - Dec 2022
  - Description : This project explores the principles of Queueing Theory, a key area in Operations Research focused on understanding and managing waiting lines and resource sharing. By studying the stochastic behavior of queues, the project aims to provide theoretical insights into the dynamics of resource allocation and design strategies for optimal utilization. Queueing Theory is essential for evaluating and improving resource performance, offering a methodological framework beyond simulation.
