

# ABDELRAHMAN SABER

## Full-Stack Engineer

Cairo, Egypt | (+20) 102 291 7856 | [tech.abdelrahman.s@gmail.com](mailto:tech.abdelrahman.s@gmail.com)  
[linkedin.com/in/abdelrahmansaberz](https://linkedin.com/in/abdelrahmansaberz) | [github.com/AbdelrahmanSaber74](https://github.com/AbdelrahmanSaber74)

## PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of experience building and maintaining production systems using C#, ASP.NET Core, Entity Framework, and SQL Server, with React on the front end. Delivered end-to-end solutions across ERP, HR & Payroll, e-commerce, delivery, and fleet-management domains, with a strong focus on clean architecture, SOLID principles, data integrity, and performance.

## EDUCATION

### B.Sc. in Systems & Computer Engineering

2024

Al-Azhar University — Faculty of Engineering, Cairo

## TECHNICAL SKILLS

**Core:** C#, .NET 8, ASP.NET Core Web API, RESTful APIs, LINQ

**Architecture & Patterns:** Clean Architecture, DDD, SOLID, Repository & Unit of Work, Specification, Idempotency & Concurrency

**Data:** Entity Framework Core, Dapper, SQL Server, PostgreSQL, MySQL

**Real-time & Security:** SignalR, WebSockets, SQL Outbox, JWT, Opaque Tokens, RBAC, Policy-based Authorization

**Integrations & DevOps:** MyFatoorah, Firebase Cloud Messaging, Docker, GitLab CI/CD, Git

**Frontend:** React, JavaScript, HTML, CSS, Bootstrap

## PROFESSIONAL EXPERIENCE

### Source Media Solutions — Full-Stack Engineer

Mar 2026 – Present

Remote, Kuwait

Full-stack engineer at a Kuwait-based software company, working remotely to build and maintain 13+ production applications end-to-end. Deliver .NET 8 backends on Clean Architecture with React front-ends, focusing on payments, real-time features, concurrency, and data integrity across diverse business domains.

### Horizons For Development Co — Full-Stack Engineer

Feb 2023 – Feb 2026

- Developed and delivered an integrated HR & Payroll system covering employee data management, attendance, and payroll processing.
- Built an Academic Management System handling students, instructors, and related academic operations.

### Drive-XL (Freelance) — Full-Stack Engineer

3 months

- Developed REST APIs supporting the operations and digital services of an Uber-affiliated vehicle fleet management system.
- Built a dashboard for managing and monitoring the system's data and operational workflows.

### Easy World — Full-Stack Engineer

Multi-Service E-Commerce & Delivery Platform

- Developed a unified platform combining e-commerce with on-demand ordering and delivery services.
- Implemented backend and frontend: order & delivery management, in-app chat, and custom pickup-and-delivery services based on customer-selected locations.
- Built a multi-vendor marketplace enabling stores and companies to onboard, manage storefronts, and list products and services.

## PROJECTS

### ORO — Gold & Jewelry E-Commerce & Retail POS Platform

Kuwait

.NET 8, ASP.NET Core, Clean Architecture, EF Core, PostgreSQL, Docker, MyFatoorah

- Designed and built RESTful APIs with .NET 8 and Clean Architecture (5-layer DDD) for a gold & jewelry e-commerce and retail POS platform.
- Built a real-time gold-pricing snapshot & locking engine that fixes gram prices for one hour during checkout to absorb market volatility.
- Implemented hybrid authentication — JWT for registered users and scoped opaque tokens for guest checkout — with role- and policy-based authorization.
- Developed omnichannel POS and multi-branch inventory services (barcode scanning, piece tracking, breakage sales) with automated PDF invoices and receipts.

- Integrated MyFatoorah (K-Net, cards, payment links) with webhook reconciliation, a customer wallet, and vendor balances; enforced Kuwait KYC/AML checks and checkout integrity via EF Core idempotency locks.

### **Mashaweer — Ride-Hailing Platform**

*ASP.NET Core, SignalR / WebSockets, SQL Server, Dapper, JWT, Firebase, GitLab CI/CD*

- Built a real-time ride-hailing backend covering ride requests and status updates, live driver tracking, in-app chat, scheduling, payments, and notifications.
- Led migration of real-time communication from MQTT/HiveMQ to a self-hosted SignalR-over-WebSockets architecture, removing paid third-party dependencies.
- Guaranteed reliable event delivery with a durable SQL Outbox, idempotent handling (eventId/version), auto-reconnection, and offline sync; Firebase push as fallback, deployed via GitLab CI/CD.

### **Library Management System**

*Oct 2024 – Dec 2025*

- ASP.NET Core + SQL Server system automating library operations (books, authors, categories, subscribers, rentals) with a metrics dashboard, reporting on overdue rentals, role-based access control, and multilingual localization.

Repo: [github.com/AbdelrahmanSaber74/LibraryManagementSystem](https://github.com/AbdelrahmanSaber74/LibraryManagementSystem)

### **HR & Payroll System (Private)**

*Mar 2023 – Feb 2026*

- Comprehensive HR & Payroll system automating employee information management, attendance tracking, salary calculation, and payroll report generation.

### **OralSync — Graduation Project (Grade: Excellent)**

*Oct 2023 – Jul 2024*

- Mobile application connecting dental-college students with financially disadvantaged patients to facilitate essential dental examinations.

Repo: [github.com/AbdelrahmanSaber74/OralSync-GraduationProject](https://github.com/AbdelrahmanSaber74/OralSync-GraduationProject)

### **Queueing Theory (Java)**

*Oct 2022 – Dec 2022*

- Operations-research project modeling queueing systems to analyze waiting-line behavior and design strategies for optimal resource allocation and utilization.

Repo: [github.com/AbdelrahmanSaber74/Queueing\\_theory\\_ex\\_1](https://github.com/AbdelrahmanSaber74/Queueing_theory_ex_1)

## **TRAINING**

---

- TS-Oracle (ERP System) — Backend Trainee, Jan – Mar 2023.
- Information Technology Institute (ITI) — Backend Developer Training, Sep – Oct 2022.
- Az-Sencs — Backend Developer Training, Jul – Oct 2021.
